

# Breast screening: Health promotion updates

# Health promotion updates

We have spoken to 309 people with a learning disability and 436 carers and providers at events.

We have called 657 people with a learning disability who missed their breast screening appointment and rebooked them.

# Health promotion updates

We have helped people with a learning disability to access reasonable adjustments for their appointment.

We are creating new resources about the Assessment Clinic. We will be asking for feedback soon.
