

# Housing Investment Strategy

2025 to 2030

This **strategy** explains how we will spend money on housing over the next **5** years

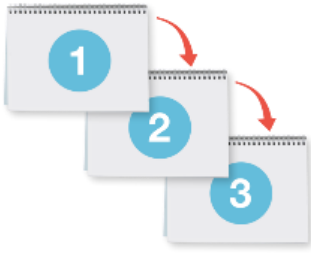

A **strategy** is like a plan

We want to make sure everyone in Camden has a safe, warm and dry home

We look after more than **22 thousand** social housing homes

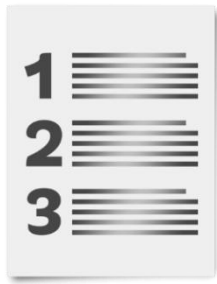

## Main goals

We have **3** main goals for our social housing

- build more homes
- make current homes better
- make sure our homes meet people's needs

## How Camden will do this

We will

- use the **Community Investment Programme** (CIP) to build new homes
- add more homes to **Camden Living** - this is a company that gives low-cost homes to people who can't get council housing
- continue the **Family Friendly Programme** - this means building more homes with **2** or more bedrooms to help families who live in overcrowded homes
- use the **Acquisition Programme** - this is a government plan to buy homes to use for
  - temporary accommodation (short-term places to live)
  - and refugees (people who have had to leave their country)
- have a clear plan for looking after and improving council homes
