Provider Feedback

Presented by

Clare Philips (on behalf of Camden LD service providers)
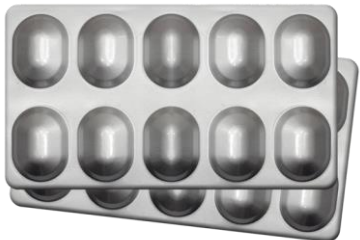

What is working well in Camden?

- Teams are good at working together, and at working in new ways

- Greenwood has a lot of opportunities e.g. drama groups

- Floating Support / community support is really useful to reduce isolation and do activities

- Blister packs are useful – it is easier to manage medication and avoid overdose

What is working well continued

- Supporting employment opportunities e.g. providers employing people with Learning Disabilities, a resident running a knitting group

- There is a quick response where there is a **clinical** need - where you need care from a health professional

- Good work with local councillors –
  - We know who they are
  - They are able to help if things need to be looked at more seriously

What is your main challenge?

- There are lots of referrals, and it is more difficult when waiting for funding to be agreed

- Funding and **procurement.** The steps that need to be taken to get new services e.g. setting up a contract

- Getting computer systems to work together

- Lack of diversity across some services

What one change would you make in Camden if you had a magic wand?

- All computer systems talk to each other and share information between organisations

- More funding so:
  - Support workers can be paid better, more people apply for jobs and stay for longer

  - So that providers don't have financial pressure and have to close

  - So health staff can continue to offer drop in as needed rather than people getting a set number of sessions

Magic wand ideas continued

- Change society completely
  - attitudes towards people with Learning Disabilities
  - so that people with Learning Disabilities are fully included into society
  - all mainstream activities are completely accessible and inclusive
  - there are meaningful jobs for people with Learning Disabilities

- Can we have a genie with 3 wishes, rather than a magic wand!
